

# VRA-143 SERIES

## VERTICAL ROD ASSEMBLIES

for Detex Exit Control Lock Systems (230 Series)

### Function and Operation

A Vertical Rod Assembly (VRA) is used with a Detex Exit Control Lock (ECL-230) to provide exit control security on an outswinging

double door. In addition it may be used on a single door installation to provide top and bottom latching instead of the single point latching provided by the Exit Control Lock itself.

1. Specify lock and accessories fully as per "What to specify" instructions in ECL-230 insert, this Catalog.
2. Add rod set number 143 and indicate type of installation to be made by letter: "B", "C" or "D".
3. Add nominal door height, in inches (up to 120").  
Example VRA-143-B-84

**NOTE:** Always specify each leaf separately. For example full specifications of Type "C" Installation should take this form:  
ECL-230 445x 445  
ECL-230 445 x 143C-84

### Locking

The VRA-143 has no provision for locking from the outside. Door may be locked/unlocked from outside only if the accompanying ECL-230 is installed with an outside cylinder in a Type "C" installation.

## Detex Limited Warranty

Comes with Detex's three-year limited warranty. The Vertical Rod Assembly is warranted to be free of defects in material and workmanship when properly installed, used and maintained according to instructions. We will, for a period of three years from the date of purchase, repair or replace any part which, upon our examination, proves to be defective under normal use. This does not apply to batteries or to damage from battery leakage. This warranty will be honored only upon presentation of proof that the product covered thereby was purchased directly from an authorized Detex Distributor. WE SHALL NOT BE LIABLE FOR ANY DIRECT, INCIDENTAL OR CONSEQUENTIAL LOSS OR DAMAGE ARISING OUT OF THE FAILURE OF THIS DEVICE.
